

# Interlocking Concrete Pavement Institute

*presents*

## Permeable Interlocking Concrete Pavement Workshops

### Sponsors

- Low Impact Development Center
- Interlocking Concrete Pavement Institute
- North Carolina State University, Department of Biological and Agricultural Engineering
- North Carolina Cooperative Extension
- Toronto & Region Conservation Authority

### Dates/Locations

Oct. 21, 2008 - Earth Rangers Centre, Woodbridge, ON, Canada

Oct. 28, 2008 - Tacoma Community College, Tacoma, WA

### Registration

Please register online at:  
<http://www.ncsu.edu/picp/upcoming.html>

Continuing education credits and professional development hours (PDHs) will be offered.

The Low Impact Development Center, Inc.

Biological & Agricultural Engineering

## About the Workshop

As low impact development (LID) continues to increase, a better understanding of technologies and practices are needed to make it successful. One of the emerging practices across the U.S. and Canada is permeable interlocking concrete pavement or PICP. This workshop provides an overview of PICP, an update on NCSU-led and other research, design guidance, construction and maintenance procedures, and introduces two design models. The workshop is intended for design professionals--civil engineers, landscape architects and planners--as well as for representatives from local, state and provincial stormwater agencies.

Participants should bring laptops to the workshop as the two models will be distributed and a case study using them will be conducted.

NCSU-BAE, Campus Box 7625, Raleigh, NC 27695 - 919-515-6780
