

Acknowledgments

LMI prepared this document under a grant (83050601-0) from the U.S. Environmental Protection Agency (EPA) Office of Water. Research staff from our Facilities and Asset Management Group led this effort. The team was comprised of Emil Dzuray, Julian Bentley, Erica Rohr, Heather Cisar, Lisa Powell, Emily Estes, and Diana Lanunziata. We acknowledge the efforts of the many other people who participated in the development and completion of this document. In particular, we are grateful to Ms. Ann Daniels from the American Public Works Association, Mr. Neil Weinstein from the Low Impact Development Center, and Mr. Robert Goo from the EPA Office of Water.

The views, opinions, and findings contained in this document are those of LMI and should not be construed as an official agency position, policy, or decision, unless so designated by other official documentation. Furthermore, LMI makes no warranty, expressed or implied, with the respect to the use of any information, apparatus, method, or process disclosed in this document or assumes any liabilities with respect to the use of, or damages resulting from the use of, any information, apparatus, method, or process disclosed in this document.

LMI is a not-for-profit government consulting firm, dedicated exclusively to advancing the management of the government. We help managers in public agencies make decisions that enable immediate action, achieve desired outcomes, and deliver enduring value. We provide a broad range of services across six mission areas: acquisition, logistics, facilities and asset management, financial management, information and technology, and organizations and human capital. (For more information about LMI, visit www.lmi.org.)
